Joplin, MO – Northrop Grumman Corporation (NYSE:NOC) has recognized EaglePicher Technologies during the company's Supplier Excellence Awards.

"EaglePicher has helped to advance national security solutions and achieve mission success," said Matt Bromberg, Corporate Vice President, Global Operations Northrop Grumman. "Northrop Grumman's supplier partners connect and protect the warfighter, defining what is possible in the battlespace because of our shared commitment to the highest industry standards across the defense industrial base."

Recognized for Performance Excellence, EaglePicher was instrumental in aiding Northrop Grumman with manufacturing and distribution goals as the industry works to support Department of Defense customers and other commercial entities.

"EaglePicher is honored to be recognized by Northrop Grumman for our contribution to advancing power solutions," stated Ron Nowlin, Senior Vice President Program Management, EaglePicher. "This award is a testament to our commitment to excellence and our dedication to supporting our partners in achieving their mission objectives. We are proud to collaborate with Northrop Grumman and look forward to continuing to deliver high-quality battery solutions that meet the industry's highest standards."

Northrop Grumman is a leading global aerospace and defense technology company. Their pioneering solutions equip their customers with capabilities they need to connect and protect the world and push the boundaries of human exploration across the universe. Driven by a shared purpose to solve our customers' toughest problems, their employees define possible every day.

About EaglePicher

EaglePicher Technologies designs, develops and produces mission-critical power systems. EaglePicher is an industry leader in defense and aerospace grade batteries, battery management systems and energetic devices. For 100 years, the company has served critical defense, space and aviation battery applications. EaglePicher encompasses eight U.S. manufacturing and research and development sites and employs more than 800 team members.
